## Investor Relations

### *Press Release*

### **ENDESA'S CCGTs AT SAN ROQUE (CÁDIZ) AND BESÓS (BARCELONA) HAVE SUPPLIED TO THE GRID A TOTAL 580,000 MWh SINCE THEIR COMMISSIONING LAST JULY**

**New York, September 6<sup>th</sup>, 2002.** - ENDESA's (NYSE:ELE) CCGTs in the Spanish mainland have supplied a total 580,000 MWh to the grid since their commissioning last July. The 400 MW plant at San Roque (Cádiz) generated 320,000 MWh, while the plant at Besos (Barcelona) – also with a capacity of 400 MW - had a total output of 260,000 MWh.

The energy sold by the above plants represents 2% of Spain's total electricity generated in July and August.

Apart from increasing the coverage of overall demand in Spain, the above two plants reinforce the generation capacity in markets which are showing high growth rates.

The remaining CCGTs which are being built in the mainland (Tarragona and Huelva) are expected to be commissioned before August 2003 and the third quarter 2004, respectively.

On the islands, ENDESA commissioned the CCGT plant at Son Reus (Majorca) last July and has started the construction of three new CCGTs, two in the Canary Islands and one in Majorca.
